GeoNet Quickstart
Adding Wireline record

Note:

Wireline consists of **Basic Wireline Data** and **Wireline Run** records. **Wireline Run** has two (2) sub-records:

a. **Wireline Tool**

b. **Wireline Activity**

1. To create a new **Wireline** record, select a **Well** record and a **Day** record from the **Well Operations** and **Day** selectors respectively.

2. Mouse-over the **GeoNe**t tab and select **Wireline Run** from the drop down menu.

   This will load the **Wireline Data** page, showing the existing record associated with the selected **Well** and **Day** records.

3. Click either the **Add New** button or the **Add Wireline** button.

Figure 1.1 Adding New Wireline

4. This will load a new **Wireline Data** web form pre-populated with **Previous Day's** record.

5. Fill in all the required fields denoted with **_Red Vertical Bar_** and other necessary information.

6. Enter the **_Suite Number_** next to the **_Suite #_** label**.** This information is required and should not be left blank. Fill in other necessary information.

   6.1 By default, **_Wireline Run_** component is available right below the **_Basic Wireline Data_**. Fill in the necessary **_Wireline Run_** data.

      6.1.1 To create additional **_Wireline Run_** entry, click the **_Add Wireline Run_** button.

      6.1.2 To add the **_Wireline Tool_**, click the **_Add Wireline Tool_** button. Once the page has loaded, enter the necessary **_Wireline Tool_** information.

      6.1.3 To add the **_Wireline Activity_**, click the **_Add Wireline Activity_** button. Once the page has loaded, enter the necessary **_Wireline Activity_** information.
